

SPY EYE

*Compact optical system •
Situational awareness •*

Situational awareness (120°) before abandoning the vehicle

In accordance to the ballistic protection of the vehicle

Effective alternative for rear door periscopes

Easy and quick to use

Other key features:

Easy integration; applicable to almost any (existing) military vehicle

SPY EYE

Technical data

The Spy Eye can be used for almost any military vehicle, having a need for an optical direct view through, for instance, the rear ramp door. The optical field of view is minimal 120°. Therefore, the Spy Eye is covering sufficient area to have a save, quickly and smooth disembarkment procedure.

Total length of 113 mm
Optical field of view (vision angle) minimal 120°
Eye relief 30 up to 40 mm
In accordance to the ballistic protection, defined as: "Armour protection in accordance with NATO rifle 7 .62 AP ammunition"
Simple solution for closing the Spy Eye properly
Manually opening and closing
Easy usage and optimal performance while wearing military gloves, gasmask and/ or helmet
Maximum protection against scratches, due to sand, mud, dirt and or snow, caused by footsteps of the crew or during driving of the vehicle.
Fitted with laser protection filter against incoming laser light 1064 nm (OD6), in accordance to DIN 58215 level 4.
Robust, reliable and minimum of maintenance needed
Not hampering during (dis-) embarking of the vehicle
No special cleaning devices needed
